

SportFlex Products

SPORTFLEX STANDARD

FOR RESURFACING OF MINIMALLY DAMAGED AREAS

Cracking is repaired with a tension-resistant rubberized compound. Surface coated with a high-risk color coating infused with our proprietary SportFlex emulsion.

SPORTFLEX PREMIUM

FOR RESURFACING OF COURTS SHOWING TYPICAL CRACKING AND WEAR PATTERNS

Cracking is repaired with a tension-resistant rubberized compound. Polymer infused cementitious base coat is applied to maintain expansionary integrity. Surface coated with a high-grade color coating infused with our proprietary SportFlex emulsion.

SPORTFLEX ULTRA

FOR RESURFACING OF SEVERELY DAMAGED COURTS SHOWING STRUCTURAL DEGRADATION

1/4" - 3/8" rubberized base is poured-in-place over the existing surface to achieve maximum structural integrity. Base is grouted with a high adhesion, flexible grouting compound, primed with polyolefin based primer and surface is coated with a high grade color coating infused with our proprietary SportFlex emulsion.
