

FLEXGRASS

FlexGrass is an IPEMA certified synthetic turf and poured-in-place rubber safety surfacing. It utilizes the same cushion-based sublayer as our rubber top systems. The top, or "wear" layer, is then set with some of the highest quality synthetic turf available.

THE FLEXGRASS ADVANTAGE

FlexGrass uses an infill which can create, on average, a surface 10 degrees cooler than systems utilizing loose rubber infill. It is fall height certified for ASTM 1292 and meets guidelines established by the Americans with Disabilities Act (ADA) and Consumer Product Safety Commission (CPSC).

- Installs easily in just 2 days
- Virtually maintenance free
- Completely porous and dries quickly after wet weather
- 60 oz. top layer, the most dense in the industry
- Nail free, nylon free, heavy metal free
- Non-SBR infill
