

Koolflex[®]

Surfacing System[®]

POOL DECKING ENGINEERED TO LAST

Unlike typical acrylic systems, Koolflex's proprietary thermoplastic properties make it highly resistant to cracking, chipping, peeling and fading. It can also be installed right over existing damaged surfaces... no demolition needed.

The Koolflex Advantage:

- Available in an array of colors which can be tailored to meet your specific pool deck needs
- Built to withstand areas of high chlorination, alkaline and UV exposure
- Cushioned for a softer feel on feet
- Less maintenance
- Higher crack, chip and wear resistance
