

# ULTRAFLEX™

## OUR HIGHEST QUALITY POURED-IN-PLACE PRODUCT

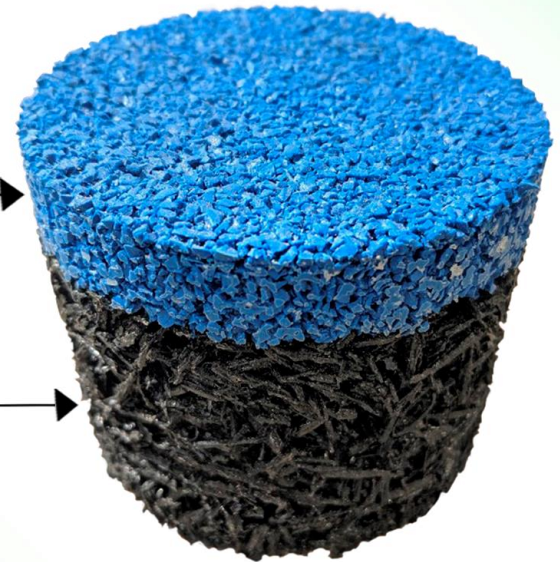

UltraFlex is the highest quality, longest lasting rubber safety surfacing on the market. It is a poured-in-place two layer system, and uses a small granule (.5 - 1.5mm) TPV for the top surface wear course. Elevated urethane ratios bind the smaller granules together for a superior product.

Smaller Granule  
TPV (Thermoplastic  
Vulcanized Elastomer)  
Layer

Rubber Buffings

## *The UltraFlex Advantage:*

- Wide variety of colors
- Suitable for all age play areas
- Great for design work
- IPEMA Certified
- Thickness can be modified to meet varying critical fall heights
